

This book teaches disciplined, readable, and efficient programming in the C programming language (as described in ANSI 90), with an emphasis on solving the types of problems that are widely encountered by programmers. Follows three major themes: basic C, efficient C, and other C topics. Covers the general layout of a C program, control structures, functions, the C preprocessor, and the use of C to achieve efficient programs. Explores the I/O library, UNIX programming, and an introduction to C++. For anyone needing an introduction to programming in C.
